

Aloe
VERA

Removes formaldehyde from the air. Can be used topically for burns on the skin.
Care: Prefers well-drained soil with slight drying between waterings.
Full sun is best with protection from high heat.

Areca
PALM

General air purifier, especially as it grows larger.
Care: Moderately drought tolerant and prefers partial sun and well-drained soil.
Palms like cooler temps, in the 60-75 degree range.

Rubber
PLANT

Cleans air by emitting high oxygen content & purifies indoor air by removing chemicals like formaldehyde and other toxins.
Care: Likes filtered light, infrequent watering and rich soil.

Boston
FERN

Acts as a natural air humidifier, removes formaldehyde and is a general purifier...
Among the best in air purifying houseplants.
Care: Likes bright light & damp soil but can be tolerant of drought or partial light.

English
IVY

Known for removing the chemical benzene, a carcinogen found in cigarette smoke, detergents, pesticides & more. Removes formaldehyde. Helps asthma & allergies.
Care: Can be invasive, making it great for a potted plant.

Ficus
TREE

Removes formaldehyde, benzene and trichloroethylene. Known to be a great overall air purifier.
Care: These types of houseplants love indirect sunlight; be careful not to overwater.

Snake
PLANT

Also known as mother-in-law's tongue, this plant is one of the best for filtering out formaldehyde that is common in cleaning products, toilet paper, etc.
Care: Thrives low light and steamy, humid conditions. Great for bathrooms!

Golden
POTHOS

Removes formaldehyde and carbon monoxide in the air.
Increases general indoor air quality.
Care: Needs less water in colder temps and partial sun.

Peace
LILY

Removes benzene, trichloroethylene and formaldehyde. Removes mold spores in the air, making it great for bathrooms, kitchens & laundry rooms.
Care: Easy to care for, it prefers lots of water, less often and bright, indirect light.
